EDUCATION AND PROFESSIONAL TRAINING

Bachelor's Degree in Telecommunications Engineering
Instituto Superior Politécnico Cardeal Dom Alexandre do Nascimento
Malanje, Angola

PROFILE

I am a Web Developer and Telecommunications Engineer, passionate about technology, innovation, and creating digital solutions that positively impact my environment. A self-taught and detail-oriented professional, I have practical experience developing institutional websites, online stores, and web radio systems, focusing on clean design, responsive layouts, and seamless user experience.

I work with technologies such as HTML5, CSS3, JavaScript, Node.js, Express, Handlebars, Bootstrap, MySQL, Git & GitHub, React.js, and TailwindCSS, building full-stack web applications that combine performance and usability.

Leveraging my background in Telecommunications Engineering, I also apply knowledge of networking, signal transmission, and streaming technologies (including Icecast) to develop web radio solutions that merge real-time broadcasting with modern web platforms.

EXPERIENCE

Web Developer | Software Developer – Independent Projects (2023–Present)
